Blinkit Sales Performance Dashboard

Overview

- Developed an interactive Power BI dashboard to analyze retail sales data and generate actionable insights.
- Focused on enabling data-driven decision-making through visualization and KPI tracking.

Objectives

- Analyze sales performance and trends
- Identify key revenue drivers
- Evaluate outlet and location performance
- Support business decision-making using data

Tools & Technologies

- Power BI (Dashboard & Visualization)
- DAX (KPI Calculations)
- Excel/CSV (Data Source)
- Power Query (Data Cleaning & Transformation)

Key Contributions

- Built dynamic KPI metrics including Total Sales, Average Sales, Ratings, and Item Count
- Designed interactive dashboards with slicers and filters
- Performed data modeling and transformation
- Created visualizations for trend and category analysis

Insights & Analysis

- Sales peaked in 2018 followed by stabilization
- Tier 3 markets contributed the highest revenue
- Low-fat products accounted for ~65% of sales
- Top categories: Fruits, Snacks, Household items
- Medium-sized outlets delivered highest performance

Business Recommendations

1. Declining Sales After Peak (2018)

Suggestion:

- Introduce **targeted marketing campaigns** (seasonal + festive offers)
- Launch **new product variants** to refresh demand
- Use **discount strategies and bundles** to increase volume

---

2. Tier 3 Cities Driving Maximum Sales

- **Suggestion:**
- Expand business operations in **Tier 3 markets**
- Increase **inventory and supply chain efficiency** in these regions
- Run **localized promotions** to strengthen market dominance

---

3. High Demand for Low-Fat Products

- **Suggestion:**
- Expand the **healthy/low-fat product portfolio**
- Position products with **health-focused branding & marketing**
- Partner with brands offering **organic and fitness-oriented products**

---

4. Top Performing Categories (Fruits, Snacks, Household)

- **Suggestion:**
- Ensure **consistent stock availability** (avoid stockouts)
- Introduce **combo offers and bundle pricing**
- Optimize **product placement and visibility**

---

5. Medium-Sized Outlets Perform Best

- **Suggestion:**
- Focus on opening more **medium-sized outlets**
- Replicate their **operational model** across other outlet sizes
- Optimize underperforming outlets to match efficiency

---

6. Average Rating (~3.9)

- **Suggestion:**
- Improve **customer experience (service speed, quality)**
- Introduce **loyalty programs and feedback systems**
- Focus on **customer retention strategies**
